Minister's Message

It's my privilege to submit this 86th annual report of Alberta Education to the Legislative Assembly. This report reflects our commitment to improving results and achieving greater accountability.

During this fiscal period, provincial government priorities included:

- adequately funding Alberta's schools by providing $1.6 billion, an increase of $100 million over 1989-90
- establishing a five-year, $700 million provincial funding plan to build new schools and modernize older ones
- taking an active, leadership role in the national school achievement indicators program under the direction of the Council of Ministers of Education, Canada
- introducing new and revised junior high courses as part of the ongoing review of secondary programs begun in the mid-1980s (for example, environmental and outdoor education, business studies 9, and science 7, 8 and 9)
- promoting and supporting partnerships between schools and local business, industries and community groups
- reviewing alternatives for giving school boards across the province equitable access to fiscal resources
- preparing an Action Plan following an extensive review of three aspects of special education: funding, coordination of services and student outcomes
- establishing policy and procedures for Ministerial reviews of student placement matters.

The list of Alberta Education's achievements in 1990-91 is impressive. And, most importantly, each of these achievements has a clear focus on providing excellent education programs for the 500,000 young people who attend Alberta's public, separate and private schools.

Alberta Education Organizational Chart 1990 - 1991

Report of the Deputy Minister

Alberta Education's role and function is to provide educational leadership to schools and school boards across the province, and in so doing ensure the best possible education for every Alberta student.

Specifically, the department is responsible for:

- developing new curriculum and revising current courses
- administering and enhancing programs for assessing student achievement
- allocating over $1.6 billion annually in provincial funding to support instruction, student transportation, school building construction and other education programs
- monitoring and evaluating schools, school programs and school systems
- supporting innovation, and planning for the future.

In 1990-91, staff of Alberta Education provided strong leadership in an environment of continued fiscal restraint and rapid social, economic and technological change. We worked with trustees, teachers, parents and community partners to find more effective and efficient ways of delivering a high quality of instruction to students. We encouraged (and expected) commitment, initiative and adaptability from everyone who works in education, provincially and locally.

The significant results of our efforts, summarized in this report, were made possible because Albertans consistently place a high priority on the education of our children.

Communications Branch

Key achievements in 1990-91

In 1990-91, Communications worked with department staff to develop communication strategies for the Vision for the Nineties Plan of Action; the Excellence in Teaching Awards; Alberta's student achievement, testing and diploma programs; the Council of Ministers of Education Canada, Student Achievement Indicators Project; and the Integrated Occupational Program. The branch coordinated and provided communications support for a number of other initiatives, including Education Week, the "Royal Family in Canada" essay contest, a ceremony for the first graduating class of the Integrated Occupational Program, and displays for the opening of Alberta House in Tokyo.

Communications works with all branches of the department to keep Albertans informed about programs, initiatives, services and policies that contribute to the excellence of Alberta's education system. The branch also publishes **in•fo•cus**, a provincial newsletter, and **Intercom**, the department's internal newsletter.

Human Resources Branch

Key achievements in 1990-91

In addition to its functions of assisting branches with staffing matters and job classifications, the Human Resources Branch sponsored a number of programs to train and develop staff, including the annual Administrative Support Staff Conference. The Branch's programs are aimed at enhancing skills and organizational effectiveness, and promoting employees' health, safety, and general well-being.

Human Resources manages the department's personnel programs and services, assisting and providing information regarding staff recruitment, transfer, promotion and termination; job classification; employee relations; and performance management. The branch also provides a variety of training programs.

Planning and Information Services Division

The Planning and Information Services Division plans and initiates new projects and assists Alberta Education and school jurisdictions in planning activities that improve the quality of education. The Division also collects data and other information, and provides analyses and reports to the department and to school boards. Finally, the Division reviews legal issues in education and seeks opinions from the Attorney General in these areas.

Key achievements in 1990-91

Corporate and fiscal planning

- A four-year corporate plan was completed, and work began on an action plan for achieving the Minister's vision for education in the 1990's.
- Discussion of the fiscal equity problem (access to equitable resources for all school boards) was coordinated and facilitated.

Policy and planning

Staff of Planning and Information Services:

- coordinated government policy on reducing the school dropout rate
- continued to develop Educational Quality Indicators (EQI) to make education more results-based and accountable
- conducted/initiated surveys of business and industry leaders regarding the education system and its graduates; teacher supply and demand (with the Conference of Alberta School Superintendents); and public satisfaction with the performance of students, schools and the quality of education (with University of Alberta Population Laboratory).

Student registry

- The Information Services Branch launched the Educational Information Exchange (EIE), a province-wide student registry and electronic student data exchange for use by Alberta Education and school boards.

Legislative services

- During 1990-91, major legal issues in education included amendments to the School Act, copyright law, appeals and student attendance, and the practice review of teachers.

Student Programs and Evaluation Division

Key achievements in 1990-91

New directions for Early Childhood Services-elementary education

- A handbook for elementary schools was published for the first time. This handbook is a companion document to the junior and senior high school handbooks that have been published for many years.
- A new language learning program was developed. The new program is organized by "levels" that describe what students should know and be able to do at various stages of their language learning.
- Work began on a new mathematics program.
- Work continued on implementing a policy on program continuity. The purpose of the policy is to help all students learn as much and as well as they can.

New programs in senior high science and mathematics

- New directions were set for senior high science programs. The new programs include an entirely new course sequence, Science 10-20-30, which emphasizes the relationships among science, technology, and the role of science in our society. The development of science programs involved a large number of people in schools, post-secondary institutions, business and industry, and professional groups.
- Most senior high mathematics programs were revised and implemented. The revised programs emphasize problem-solving and analytical skills, and give students a better understanding of mathematical concepts.

Launching Career and Technology Studies

- A program structure was prepared for the new Career and Technology Studies (CTS) program. CTS is a comprehensive and innovative program, updating and replacing the current senior high courses in business education, home economics, industrial

The Student Programs and Evaluation Division creates, reviews and revises provincial school programs and learning materials for teachers and students. The division also creates, administers, marks and reports results on provincial achievement tests and diploma examinations.

education and vocational education. The goal of CTS is to give students more opportunities to link theory and practice, associate and apply what they learn in core courses to their daily lives and the workplace, and prepare for careers in highly skilled and technical fields.

Validation of the Integrated Occupational Program

- Validation of Integrated Occupational Program (IOP) courses for grades 8 to 12 was completed. In 1990-91, close to 5000 students in grades 8 to 11 enrolled in IOP in 107 schools.

New second language programs

- Work began on the development of a new French as a second language (FSL) program for grades 1 through 12, based on nine levels of language proficiency. The new program supports the placement of students in FSL according to their skill level. The provincial standard for French 30 was raised to level 6 of the nine-level program. Curriculum for the Beginning level (FSL 1, 2 and 3) of the program was developed and approved for optional implementation in the fall of 1991.
- Work began on a Japanese as a second language program, Early Childhood Services through grade 12.

Improved student evaluation

- Under the direction of the Council of Ministers of Education, Canada (CMEC), Alberta Education and the education ministry of Quebec worked on the assessment component of the School Achievement Indicators Program. First steps included identifying common expectations, and developing instruments to assess the achievement of Canadian students, ages 13 and 16, in reading, writing and mathematics.
- For the second year, performance-based assessments were tried out in elementary and junior high schools (in mathematics, science,

language arts and social studies). Teachers responded extremely positively.

- In March 1991, Alberta students participated in an international assessment of mathematics, science and geography. The results will add an international perspective to discussions about standards of student achievement in the province.

Special education initiatives

- The Special Education Review Discussion Paper and Action Plan addressed issues in funding, coordination of services and student outcomes. These documents were distributed to Albertans for further discussion and response.
- Alberta School for the Deaf (ASD) provided a wide range of educational and support services to deaf and hearing impaired students. ASD adopted the Bilingual/Bicultural (Bi-Bi) Deaf Education Model, based on American Sign Language and English.

Distance learning initiatives

- The Alberta Correspondence School (ACS) continued to develop distance learning packages and independent learning programs (computer assisted instruction or computer managed learning), primarily for senior high courses. These services provide equitable access to programs for all students, including those who attend small high schools. They also permit students to learn at their own pace and tailor their education programs to suit their individual situations.
- In 1990-91, following a course fee increase effective June 1, 1990, enrolments at the Alberta Correspondence School decreased. (See Table 6, page 27.) The fee increase and the enrolment decrease reflect two major changes within and outside of ACS. First, more school boards are offering their own distance learning programs with funds from Alberta Education's Distance Learning Program

grant. In these cases, students are taking courses developed by ACS, but they are not officially "enrolled" at ACS. Second, in 1990-91 the ACS moved away from offering adult general interest courses.

Learning Resources Distributing Centre (LRDC)

- The LRDC continued to provide quality learning resources for Alberta's teachers and students. Sales for 1990-91 totalled $33,379,652.

Regional Services Division

Key achievements in 1990-91

Consulting and leadership

The five Regional Offices of Education (in Grande Prairie, Edmonton, Red Deer, Calgary and Lethbridge) continued to support, advise and communicate with school boards, private schools, and Indian band-operated schools in their regions. Following are some of the highlights of their work in 1990-91:

- helping schools implement program continuity policy and practice — often by sponsoring workshops and awareness sessions for parents, teachers, principals, superintendents and trustees
- encouraging school-community partnerships
- coordinating Ministerial reviews of disputes about special education placement decisions
- assisting and encouraging schools and school jurisdictions that are integrating more special needs students in regular programs
- supporting the establishment of consortia to provide professional development programs and inservice education for teachers (Lethbridge)
- responding to appeals on student suspensions and expulsions
- helping parents, teachers, central office administrators and school boards resolve disputes
- providing inservice training to teachers, superintendents and trustees on curricular, policy and legislative changes.

The Regional Services Division works closely with school jurisdictions and communities throughout Alberta and provides them with consulting, administrative, evaluation and planning services. The Division also provides direct services to students and teachers, including exchange programs and teacher certification services.

Monitoring and evaluation

Regional Office staff:

- coordinated 20 school system reviews, provided leadership to teams of evaluators (superintendents, secretary-treasurers, trustees and other Alberta Education staff), and prepared evaluation reports
- monitored results achieved in selected subject areas (for example, senior high social studies)

- monitored the progress of schools and school boards in developing policies (for example, policy on suspension and expulsion).

Ministerial reviews, Attendance Board cases and Special Needs Tribunals

- There were 37 reviews by the Minister, dealing mainly with special needs placements, funding special programs for students, and expulsions.
- The Attendance Board received 35 cases involving students under age 16 who failed to attend school as required by law.
- One Special Needs Tribunal was convened to determine programs and support to be provided for a student whose special needs could not be met in a program provided by a school board.
- In the context of the total number of students attending Alberta schools (approximately 450,000), these numbers were relatively low. The Student Appeals and Attendance Secretariat continued to encourage school boards and parents to resolve these types of disputes at the local level whenever possible.

Teacher certification and development

- The Certification of Teachers Regulation was revised to require all applicants for certification to declare a criminal conviction record. Under the new regulation, applicants with indictable or serious criminal convictions that could impair their ability to teach are not issued teaching certificates.
- Teachers who are now teaching and who incur criminal convictions continue to be subject to a discipline process.
- The Teacher Certification and Development Branch continued to provide support for the Council on Alberta Teaching Standards (COATS).
- The Council on Alberta Teaching Standards (COATS) received seven complaints of unskilled teaching practice; two of these complaints resulted in hearings conducted by competency review

panels. The Excellence in Teaching Awards program, a project of COATS, entered its second year. There was a significant increase in the number of nominations received, and 255 local awards were given in 1990, up from 153 in 1989.

- "Forum '90, Future Teacher Education in Alberta," an initiative of COATS, resulted in recommendations on teacher preparation, teacher supply and demand, and teacher professional development.

Native education project

- The Native Education Project worked with the Indian Association of Alberta to produce and publish **Legacy: Indian Treaty Relationships**, a basic resource for grade 10 social studies.
- The Native Education Project continued to implement the provincial Native education policy by sponsoring workshops and Native awareness sessions for Native parents, students and teachers; monitoring and evaluating progress in the 46 school jurisdictions offering Native education programs and services; and providing consultative services to Native organizations.
- The Native Education Project worked with the Language Services Branch to develop a curriculum for Cree 10, 20, 30 and Blackfoot 10, 20, 30.

National and international education

- The division coordinated student (language) exchanges with Quebec and Germany; and teacher exchanges with Japan, Australia, Germany, United Kingdom, United States, and other Canadian provinces. (See Table 14, page 59.)
- International activities in education included joint ventures with Ukraine, Russia and Japan; and international school partnerships with Japan, Korea, China, Thailand, Botswana and Ukraine. (See Table 15, page 59.)
- The school extension program funded school jurisdiction programs for adults who need to upgrade their academic skills.

Finance and Administration Division

The Financial Services Division provides financial and administrative services to support Alberta Education's programs, priorities and initiatives. The Division distributes grants to school boards and administers funds for Alberta Education's internal operations. The Division also provides financial and administrative advice and support to school boards and to Alberta Education staff.

Key achievements in 1990-91

School buildings

- The government announced a five-year, $700 million capital plan for 1991 through 1995. School boards welcomed the province's commitment to provide $140 million annually over the next five years to help build new schools and modernize and upgrade older ones. (Provincial funding for capital programs in the previous fiscal year, 1989-90, had been $85 million.)
- The five-year capital plan was designed to help school boards do more long-term planning and to give school boards more flexibility to shift priorities, substitute projects and change timelines. This flexibility helps boards deal with unexpected challenges such as rapid enrolment growth related to industrial development.
- For the Building Quality Restoration Program, school boards were given the option of applying for block ($57 per pupil) funding instead of submitting proposals for each individual project. This alternative was especially helpful to large urban boards, but was made available to all boards.
- The **School Capital Policies, Regulations and Guidelines Manual** was completed and distributed to boards.

Financial and administrative assistance to school boards

- Alberta Education distributed provincial grants for instruction, student transportation and school capital (totalling $1.6 billion) to school boards. The basic instructional grants for the year were: $2027 for each elementary student, $2180 for each junior high student, and $2351 for each senior high student. (See Table 22, page 66, for details.)
- In response to special requests from 20 school boards, Alberta Education provided $1.6 million in contingency funding to 15 jurisdictions.

- Incremental grants totalling $1.3 million were provided to 16 school jurisdictions.
- Alberta Education assisted school boards by: reviewing their financial operations (8 jurisdictions) and transportation management (6 jurisdictions); working with the Faculty of Extension, University of Alberta, to provide a course in business management and administrative procedures for secretary-treasurers; and arbitrating disputes about tuition fees, student transportation and other issues.

Internal administration

- An improved budget preparation system gave senior management better information for making budget decisions, and a manpower database provided more specific information about costs and changes during the year.
- Information and advice about the Goods and Services Tax was provided to Alberta Education staff.
- Accounting, payroll, accommodation, mail, photocopying, computer networking and other support services were provided to Alberta Education staff.

*Students apply in their year of graduation. To receive the scholarship, they must be enrolled full-time at a post-secondary institution. A maximum of $1500 may be awarded – the value of the scholarship depends on the student's scholastic achievement in grades 10, 11 and 12. Students must have an average of at least 80 percent calculated on marks in 5 designated subjects for each year. Criteria are available from the Alberta Heritage Scholarship Fund.

**Total refers to total scholarship counts, not student counts. Some students were eligible for the scholarships based on their marks in more than one course level.

Table 4

General Educational Development Testing Program Results*

Source: Information Services Branch

	1988-89	1989-90	1990-91**
Individuals writing tests	3,816	3,761	3,379
Individuals awarded diplomas by passing tests	2,636	2,579	2,282
Tests administered			
Mathematics	3,436	3,212	3,385
Interpreting Lit. & Arts	3,354	3,153	3,229
Science	3,247	3,056	3,162
Social Studies	3,359	3,094	3,178
Writing Skills	3,548	3,303	3,422
TOTAL	**16,944**	**15,818**	**16,376**

*Figures are for the school year.

**Figures for 1990-91 are lower than those for previous years because individuals who write tests in more than one GED administration now are counted only once. Applying the same count system to 1989-90, the figures would change to 3,307 individuals writing tests and 2,332 individuals receiving diplomas.

Table 5

Achievement Test Results*

June 1991

Source: Student Evaluation Branch

Grade 3 Science – 33,837 Students	**Process Skills**	**Subject Matter**	**Both Major Components**
Percent achieving Standard of Excellence	18.1	21.1	11.0
Percent achieving Acceptable Standard	80.5	75.5	70.1

Grade 6 Mathematics – 31,930 Students	**Problem Solving**	**Subject Matter**	**Both Major Components**
Percent achieving Standard of Excellence	23.5	20.1	14.3
Percent achieving Acceptable Standard	75.4	76.6	68.9

Grade 9 Social Studies – 27,646 Students	**Process Skills**	**Facts, Concepts, Generalizations**	**Both Major Components**
Percent achieving Standard of Excellence	9.8	11.1	5.1
Percent achieving Acceptable Standard	81.4	72.4	67.9

*For further information, please see the Achievement Test Program Annual Report, 1990-91 School Year.

Table 6

Alberta Correspondence School Enrolment

Source: Alberta Correspondence School

	1989-90	1990-91
New students enroled in:		
Elementary courses	558	540
Junior high courses	1,853	1,306
Senior high courses	26,464	16,201
Adult learning courses*	2,295	177
New student total	**31,170**	**18,224**
Courses taken by new students	48,188	27,613
Students continuing courses started in the previous year	6,533	5,760
Courses being continued from the previous year	13,138	10,893
Lessons/assignments submitted for correction**	320,157	232,254

*Because of policy changes and related changes in fee structures, there was a significant decrease in most course enrolments and especially in adult student enrolments.

**New distance education courses contain assignments which are generally longer but fewer in number than the lessons in traditional correspondence courses. As more new courses are introduced, the number of lessons/assignments will decline.

Table 22a

Divisions, Districts and Counties

	September 1988 – August 1989*	September 1989 August 1990*
Divisions	$5,875.19	$5,832.19
Counties (including the Urban County of Devon)	5,173.17	5,645.23
Public School Districts (excluding Devon)**	4,694.78	4,985.39
Separate School Districts**	4,684.30	5,061.33
All Jurisdictions	4,901.03	5,245.85

*Per student expenditures exclude the Department of National Defence and Lloydminster, but include Early Childhood Services at .5. The per student expenditures were obtained by adding the September to August 1988-89 or 1989-90 expenditures for divisions and districts (reporting on the school fiscal year) to the January to December 1989 or 1990 expenditures for counties (reporting on the calendar year), and dividing the total by the respective September 30, 1988 or 1989 enrolment.

**Public school districts include the Roman Catholic public school district, the two Consolidated school districts and the Regional school district. Separate school districts include Roman Catholic and Protestant separate school districts.

Table 22b

Funded Private Schools*

September, 1988 – August, 1989	September, 1989 – August, 1990
$5,408.12	$5,523.08

*Enrolments include grades 1 to 12 plus ECS at .5; expenditures may include the entire operation of the private school, including college expenditures if applicable. The per student expenditures were obtained by dividing the total expenditures by the enrolment on September 30 of each year.

Table 22c

Early Childhood Services (ECS)

Private Operators*

September, 1988 – August, 1989	September, 1989 – August, 1990
$2,254.43	$2,503.47

*ECS Private Operators data does not include the ECS portion of private schools. The per child expenditures were obtained by dividing the total expenditures by the enrolment on September 30 of each year.
